

and DeliveryDateComponent are valid

- Defines OrderContext.Date

- Routes to CatalogComponent

The HomeComponent aims to define an OrderContext.

The TimeSlot will be used by the CatalogComponent.

TimeSlot.ListTimeSlots(OrderContext)

Delivery.GetClosestShop(Address)

OrderContext = {

Origin, Shop, Type,

APIs consumed:

User.ListAddresses(User)

Thanks to this OrderContext, the application will be able to retrieve the appropriate TimeSlot.
